VIBRO MASTER 2500

Vibro Master 2500

Seedbed preparation

Kongskilde has designed a seedbed cultivator - Vibro Master 2500 with working widths from 6,5 – 8,5 m. High performance, capacity and reliability have been key words in designing the Vibro Master 2500 series of cultivators. The Vibro Master 2500 cultivator series ensures a cost efficient way of preparing seedbed in most conditions.

Tines

Kongskilde offer 4 different types of tines for Vibro Master 2500. The cultivator can therefore be equipped according to the specific demands at the individual farm.

The tines are designed and manufactured by Kongskilde, and special production methods with punch ball treatment, hardening and powder painting ensures a long life time of the tines.

Depth control

Four wide rubber wheels control an exact working depth in all conditions. The side wings are able to float during work, meaning that the cultivator is

able to work in contours and still follow the soil.

Low maintenance

Thanks to the simplicity of the Vibro Master 2500 construction, the daily maintenance requirements are kept on an absolute minimum.

Folding / transport

The new range of Vibro Master 2500 cultivators are all with vertical folding into a transport width of 2,50 m.

Narrow transport width combined with a stabile frame construction allows safe road transport in all cases.

Strong frame

In the new construction a light frame in a very strong design has been achieved.

Technical data

Model	VIBRO MASTER 2565	VIBRO MASTER 2575	VIBRO MASTER 2585
Working width (m)	6,50	7,50	8,50
Transport width (m)	2,50	2,50	2,50
Transport height (m)	3,00	3,50	4,00
Rows of tines	4	4	4
Tine distance (cm)	8 / 10 / 15	8 / 10 / 15	8 / 10 / 15
Number of tines - SQ	81	93	105
Number of tines - S	65	75	85
Number of tines - VTM	43	50	56
Wheel size	24x8.00 - 14.5	24x8.00 - 14.5	24x8.00 - 14.5
Weight excl. Optionals (kg)	1375	1525	1675
HP demand	130-180	145-200	160-220
Levelboard	Optional	Optional	Optional
Rear harrow	Optional	Optional	Optional
